Our Biodegradable Paper Straw

Biodegradable straws as alternatives to traditional plastic options. Not only will they naturally degrade, but they're also extremely sturdy and resistant to cracking and splitting. Our selection of biodegradable straws includes unwrapped options, as well as individually wrapped styles that ensure optimal cleanliness and sanitation.

Our products provide sustainable, alternative solution to plastic straws. Panaceb straws help reduce plastic pollution by decomposing in just 45 to 90 days.

Our Biodegradable straws are made of kraft paper, FDA approved, recyclable material. Testing of our straws were conducted to obtain evidence of compliance with Council of Europe Resolution AP (2002)¹, relating to paper materials and articles intended to come into contact with food. Our samples comply with the General Requirement (Article 3) in EU Regulation No. 1935/2004 as referenced in report number SZ2015050435 (E). Inks used for printing on the surface of our drinking straws have been tested, certified and are guaranteed acceptable for direct contact with food products, in accordance with the applicable chapters and sections of Title 21 of the Code of Federal Regulations (21 CFR). All raw material and process components used are free of any fluorinated /fluorochemicals components.
